

August/Sept 2015

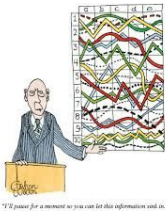

# **WELCOME BACK!**

I was so excited to see everyone back at school! I hope your summer was fun and that you got to spend some quality time with your children! I heard that some of you went on some amazing vacations while others had amazing “stay-cations”!

I ended up having a staycation. I have a 21 year old daughter, Emily. She is a senior at MIZZOU studying microbiology. She ended up interning in Columbia this summer so it was my husband, cat, dog and I hanging out at home! So needless to say..I am ready to be back in action!

## **What to Expect These First Few Weeks....**

Over the next couple of weeks I will be letting the students learn classroom norms and routines with their peers. I will also be pulling them to check on retention of skills taught last Spring to see if regression occurred. I will personally email you with that data and whether they were able to recoup the information lost over summer by the end of September.

## **How to Stay in Touch.**
